

Missing life's important events

Mike has prepared a surprise for his girlfriend's birthday but will a migraine strike again to ruin it?

Dec 12, 2018

Mike has prepared a surprise for his girlfriend's birthday but will a migraine strike again to ruin it? Migraine is classified by the World Health Organization as one of the most disabling illnesses, ranked ahead of diabetes. Up to 67% of migraine patients suffer some degree of burden and compromises to various aspects of their life such as education, career, personal relationships, family life and social activities. Preventive treatment can go a long way in helping to control the condition.
