

Chris's story: Battling advanced breast cancer

Around the world, an estimated 250,000 women are diagnosed with advanced breast cancer each year.

Aug 15, 2018

Around the world, an estimated 250,000 women are diagnosed with advanced breast cancer each year. Advanced or stage IV metastatic breast cancer is the most advanced stage of breast cancer that has spread beyond the breast to other parts of the body, such as brain, bones or liver. Chris shares her story of fighting advanced breast cancer.
